Forecast For London & Southeast England
Issued by Met Office Exeter
at 0400 on Sunday 10 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Widespread sharp frost, ice and freezing fog clearing slowly.

Today:
Frosty start with patchy freezing fog. Then bright spells for many areas, although some patchy fog may linger, especially in the south, while further north cloud will gradually increase. Cold with light winds. Maximum temperature 4 deg C (39 deg F).

Tonight:
Cloudy but mostly dry with the odd clear spell, breezy along the south coast. Less cold than previous nights but still with a frost in places. Fog patches forming. Minimum temperature -2 deg C (28 deg F).

Monday:
Monday dry initially with patchy frost and fog, then becoming cloudy with outbreaks of rain arriving from the northwest by evening. Noticeably milder. Maximum temperature 8 deg C (46 deg F).

Outlook for Tuesday to Thursday:
Tuesday, cold and dry after early rain clears south. Sunny spells developing with winds easing. Wednesday, rain turning heavy at times, windy later. Thursday, windy with early showers, drier later.
